P-HDU SERIES
PREDEFLECTED HOLDOWN ANCHORS

The P-HDU Series Predeflected Holdown Anchors are designed to connect wood framing members such as studs or posts to concrete foundations in shear wall and framing assemblies.

Manufactured from galvanized steel, these connectors include crescent washers and SDS screws for installation.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by holdown anchors. • Shear wall framing assemblies • Post-to-foundation anchorage • Stud-to-foundation connections • Wood-framed structural assemblies
MATERIAL	Zinc-Plated Steel
FEATURES	• Predeflected holdown configuration • Compatible with anchor bolts or threaded rod installations • Includes crescent washer for offset anchor placement • SDS screws provided for wood member attachment • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
