CALACATTA WHITE QUARTZ KITCHEN COUNTERTOP & ISLAND

This polished 3CM quartz countertop is built for kitchens that take daily use, from perimeter runs to full-size islands. Factory-cut slabs come with eased edges and pre-finished surfaces, which cuts down on-site fabrication and speeds up installation. Slabs are sized for common layouts and can be cut to fit custom configurations.

The Calacatta White surface looks like natural marble but has the durability and consistency of engineered stone. The non-porous surface resists moisture, stains, and everyday wear, and it never needs sealing. The 3CM thickness gives a substantial edge profile, and the slab is strong enough for islands, peninsulas, and breakfast bars.

SPECIFICATIONS

APPLICATIONS	• Kitchen perimeter countertops • Kitchen islands and peninsulas • Breakfast bars and seating overhangs • Butler's pantries and wet bars • Clubhouse, amenity, and community kitchens • Multifamily, hospitality, student housing, and single-family construction
MATERIAL	Engineered Quartz
FEATURES	• Calacatta White quartz surface • Polished finish • Factory eased edges • Pre-cut slab sizes for common installations • Selected vanity tops include pre-drilled faucet holes • Non-porous surface • Stain and moisture resistant • No sealing required • Marble-look appearance
INSTALLATION NOTES	Install on level cabinetry or an approved substrate. Secure with appropriate countertop adhesive. Seal joints and seams as required. Support overhangs according to industry guidelines for 3CM quartz.
DIMENSIONS	Thickness: 3CM
WARRANTY	Limited 1-Year
