ITEM #E1282

1/0 ALUMINUM SERVICE ENTRANCE & FEEDER CABLE

Aluminum I/0T cable for feeder and service-entrance applications. Designed for reliable power distribution in residential and commercial electrical systems. The aluminum conductors provide a lightweight, cost-effective alternative to copper while maintaining consistent performance and ease of handling during installation. Suitable for use where aluminum conductors are approved by code and local authority.

SPECIFICATIONS

PACKAGE CONTAINS	1000 Linear Feet of Aluminum Cable per coil
MATERIAL	Conductor Aluminum Alloy, PVC Jacket
COLOR	Grey
FEATURES	Lighter weight than comparable copper conductors Easier handling during pulling and routing Designed for high-capacity electrical circuits Use permitted where aluminum conductors are approved by code and local authority UL 854 listed
DIMENSION	OD 1.047" (25.4 mm)
WARRANTY	Limited 1-Year

1 YEAR WARRANTY
