ITEM #E1303

15A TAMPER-RESISTANT GFCI OUTLET

MORE STYLES AVAILABLE

15A tamper-resistant GFCI outlet for residential and light-commercial installations. Automatic self-testing provides continuous ground-fault protection and supports compliance with current NEC requirements. Test and reset buttons allow quick verification during installation and inspection. Tamper-resistant shutters enhance safety in kitchens, bathrooms, garages, and similar locations.

SPECIFICATIONS

APPLICATIONS	• Kitchens and bathrooms • Garages and basements • Laundry rooms and utility areas • Residential and light commercial electrical installations
MATERIAL	High-impact thermoplastic body with zinc-plated steel yoke
FEATURES	• Class A GFCI protection for personnel safety • Automatic self-test function for continuous monitoring • Tamper-resistant shutters for child safety and NEC compliance • Integrated Test and Reset buttons for easy verification • Fits standard single-gang wall boxes
INSTALLATION NOTES	Turn off power at the breaker before installation. Connect line and load terminals correctly if downstream protection is required. Install in a standard single-gang electrical box using copper conductors only. After installation, test the unit using the Test and Reset buttons to confirm proper operation.
DIMENSIONS	1.69" L × 4.13" W × 1.6" D
WARRANTY	Limited 2-Year
