ITEM #GE1042

COLD PLUNGE SYSTEM WITH CHILLER

This cold plunge system pairs a wood-clad, stainless steel tub with a dedicated chiller for amenity spaces in multifamily, hotel, and student housing projects. The chiller cools and heats the water, from an ice-making mode at 32°F up to 113°F, and can be controlled from its soft-touch panel or over WiFi.

The tub has a stainless steel interior, an insulated cover, and a wooden step. The chiller's built-in paper filter and ozone generator keep the water clean between changes. The chiller runs on 110V or 220V.

SPECIFICATIONS

PACKAGE CONTAINS	• Rectangular cold plunge tub with insulated cover and wooden step • 1 HP chiller with filter and ozone generator
SPECIFICATIONS	• **Tub Exterior:** Wood • **Tub Interior:** Stainless steel • **Chiller Power**: 1 HP • **Temperature Range**: 34°F to 113°F adjustable; ice-making mode to 32°F • **Voltage**: 110V / 220V • **Controls**: Soft-touch panel and WiFi control • **Filtration**: Built-in paper filter and ozone generator • **Certification**: ETL
FEATURES	• Dual temperature control for cold and warm water • WiFi and soft-touch controls • Built-in filtration and ozone sanitation • Stainless steel interior with wood exterior • Insulated cover and wooden step included
DIMENSIONS	Tub: 81.5" L x 35" W x 38.6" H
WARRANTY	2 Years, Limited
