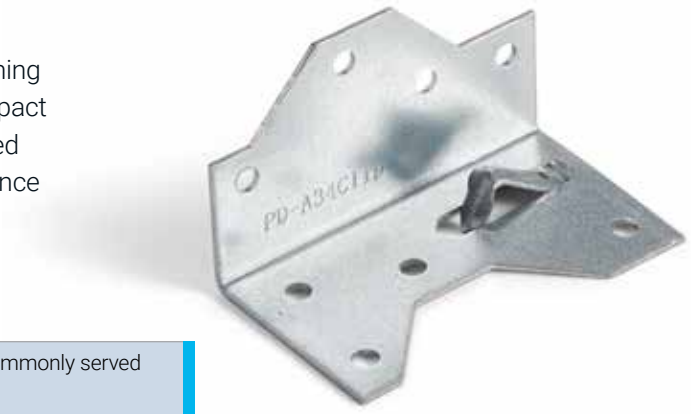
ITEM #H1601

P-A34 CLIP FRAMING ANGLE ANCHOR

The P-A34 clip is a light-gauge framing angle used to reinforce connections between intersecting wood framing members such as joists, studs, and sill plates. Its compact L-shaped design allows installation in tight or concealed locations while providing shear and lateral load resistance when properly fastened.



SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by framing angle anchors. • Joist-to-beam connections • Stud-to-plate connections • General wood framing attachments • Framing intersections
MATERIAL	Galvanized Steel
FEATURES	• Compact angle configuration for connecting framing members • Multiple installation orientations supported • Pre-punched holes for fastener installation • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
