ITEM #H1607

HEAVY STRUCTURAL HEX NUT, 1 IN.

The 1 in. Heavy Hex Nut is designed for steel connections, anchoring assemblies, and threaded rod installations in residential, commercial, and industrial construction. The standard hex profile allows installation using common wrenches and socket tools used on construction sites.

Manufactured from galvanized steel, the nut is suitable for use in exposed or exterior environments where corrosion protection is required.

SPECIFICATIONS

APPLICATIONS	• Installation with 1 in. threaded rod assemblies • Structural bolt and nut fastening systems • Anchoring hardware to concrete or steel members • Steel framing and steel connection assemblies • General construction fastening using heavy hex nuts
MATERIAL	Galvanized Steel
FEATURES	• Designed for dimensional compatibility with 1 in. structural bolts and threaded rods • Heavy hex profile supports installation with standard wrenches and sockets • Galvanized finish suitable for exterior and exposed environments • Compatible with commonly used structural bolting systems • Supplied in bulk packaging for jobsite use
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
