ITEM #H1610

9 FT. GALVANIZED CORNER BEAD

The 9 ft. galvanized corner bead is designed for reinforcing and finishing outside drywall corners in interior wall assemblies. The formed steel profile installs over drywall edges to help create straight, uniform corner lines during finishing.

Manufactured from galvanized steel, the bead is compatible with common drywall finishing practices. The standard 9 ft. length aligns with typical wall heights and installs using standard drywall fasteners and joint compound.

SPECIFICATIONS

APPLICATIONS	• Reinforcing outside drywall corners in interior walls • Drywall finishing in residential wall assemblies • Drywall finishing in light commercial interiors • Repair or replacement of damaged drywall corners • Installation in gypsum board wall systems
MATERIAL	Galvanized Steel
FEATURES	• Formed steel profile supports straight corner alignment • Galvanized finish for corrosion resistance in interior environments • Standard 9 ft. length aligns with typical wall heights • Compatible with common drywall finishing methods • Helps protect drywall edges during normal use
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
