ITEM #H1611

#8 X 1-5/8 IN. COARSE THREAD DRYWALL SCREW

The #8 × 1-5/8 in. coarse thread drywall screw is designed for fastening gypsum board to wood studs and wood framing members in interior wall and ceiling assemblies. The coarse thread pattern supports installation into wood framing substrates commonly used in drywall construction.

Manufactured from steel, the screw features a bugle head designed to seat flush with drywall surfaces during installation. The fastener is compatible with common drywall screw guns used for high-volume installation in residential and light commercial construction.

SPECIFICATIONS

APPLICATIONS	• Fastening drywall to wood stud framing • Drywall installation on interior walls • Drywall installation on interior ceilings • Attachment of gypsum board in residential framing • Repair or retrofit drywall installation
MATERIAL	Carbon Steel
FEATURES	• Coarse thread pattern designed for wood framing installation • Bugle head seats flush with drywall surfaces during installation • Compatible with common drywall screw guns • Standard drywall screw size for interior installations • Suitable for high-volume drywall fastening applications
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
