ITEM #H1614

ELECTROGALVANIZED ROOFING COIL NAIL

The 1-1/4 in. Electrogalvanized Roofing Coil Nail is designed for fastening asphalt shingles, roofing felt, and underlayment using compatible coil roofing nailers. The wire-collated format supports continuous feeding during installation in high-volume roofing applications.

Manufactured from steel with an electrogalvanized finish, the nail is suited for typical exterior roofing environments. The coil configuration is compatible with commonly used pneumatic roofing nailers used in residential roofing work.

SPECIFICATIONS

APPLICATIONS	• Fastening asphalt shingles to roof decking • Installation of roofing felt and underlayment • Residential roof shingle installation • Roofing repair and reroofing projects • High-volume roofing installation using pneumatic nailers
MATERIAL	Steel with electrogalvanized coating Wire collation
FEATURES	• Coil format supports continuous feeding in roofing nailers • Electrogalvanized finish suitable for standard roofing environments • Compatible with commonly used pneumatic roofing nailers • Wire collation improves consistent nail feeding • Suitable for repetitive roofing installation tasks
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
