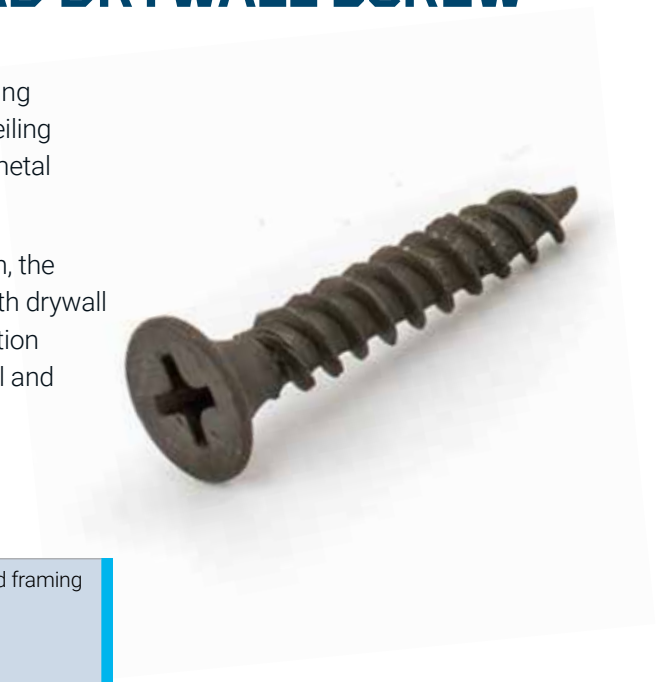
ITEM #H1616

#8 X 1-5/8 IN. FINE THREAD DRYWALL SCREW

The #8 × 1 in. fine thread drywall screw is designed for fastening gypsum board to light-gauge steel studs in interior wall and ceiling assemblies. The fine thread profile supports installation into metal framing members commonly used in drywall construction.

Manufactured from carbon steel with a black phosphate finish, the screw features a Phillips bugle head designed to seat flush with drywall surfaces during installation. The sharp point supports installation using standard drywall screw guns for high-volume residential and light commercial drywall work.



SPECIFICATIONS

APPLICATIONS	• Fastening drywall to light-gauge steel stud framing • Interior wall drywall installation • Interior ceiling drywall installation • Gypsum board installation in residential construction • Drywall repair or retrofit installation
MATERIAL	Carbon Steel with black phosphate coating
FEATURES	• Fine thread pattern designed for metal stud installation • Phillips bugle head seats flush with drywall surfaces • Sharp point supports installation without predrilling in metal studs • Black phosphate finish suited for interior drywall environments • Compatible with common drywall screw guns
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
