ITEM #H1619

2 IN. FINISH NAILS 16-GAUGE

The 2 in. 16-gauge finish nail is used for fastening trim, door and window casings, and other finish carpentry components in wood construction. The thicker 16-gauge profile supports installation in heavier trim materials commonly used in interior finishing work.

Manufactured from steel with an electrogalvanized finish, the nail is compatible with commonly used 16-gauge finish nailers. The collated format supports consistent feeding and efficient installation during finish carpentry projects.

SPECIFICATIONS

APPLICATIONS	• Door and window casing installation • Baseboard and interior trim fastening • Crown molding and decorative trim attachment • Wood-to-wood fastening in finish carpentry • Interior repair or retrofit trim work
MATERIAL	Steel with electrogalvanized coating
FEATURES	• 16-gauge profile suited for heavier trim materials • Compatible with commonly used 16-gauge finish nailers • Collated format supports consistent nail feeding • Smooth shank designed for finish carpentry installation • Electrogalvanized finish suitable for interior environments
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
