ITEM #H1622

GUTTER & DOWNSPOUT FABRICATION ALUMINUM COIL

The aluminum coil is used for forming gutters, downspouts, and exterior trim components in residential and light commercial construction. The pre-finished surface allows fabrication without additional painting.

Manufactured from aluminum alloy with a factory-applied polyester coating, the coil provides a consistent surface for roll-forming and sheet metal fabrication. The 600 ft coil length supports continuous forming in professional gutter fabrication equipment.

SPECIFICATIONS

APPLICATIONS	• Fabrication of residential and commercial gutter systems • Downspout and accessory components • Roof edge flashing and fascia trim fabrication • Exterior sheet metal trim and architectural details • Roll-formed aluminum gutter production
MATERIAL	3105 aluminum alloy with polyester (PE) coating
FEATURES	• Pre-finished aluminum surface ready for forming • Compatible with standard gutter roll-forming machines • Consistent coil thickness supports uniform fabrication • Polyester coating designed for exterior exposure • Supplied in long coil lengths for continuous production
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
