P-CUFT SERIES COMPACT U-SHAPED FRAMING TIES

The P-CUFT Series Compact U-Shaped Framing Ties are designed for roof-to-wall and framing connection applications. The wrap-style configuration allows installation across both sides of the framing member using standard fasteners through pre-punched holes.

Manufactured from 18-gauge galvanized steel, these connectors are used in wood-framed construction where compact or wrap-style framing ties are commonly installed.

SPECIFICATIONS

APPLICATIONS	• Rafter-to-top-plate connections • Truss-to-wall framing connections • Roof framing installations • New construction or retrofit framing applications • Wood-framed residential and light commercial assemblies
MATERIAL	Galvanized Steel
FEATURES	• U-shaped wrap design installs across both sides of the framing member • Designed for dimensional compatibility with common U-shaped framing tie profiles • Compact and heavy-duty profile options for different framing layouts • Pre-punched holes support fastener installation • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
