ITEM #H1636

P-MASA/P-D1493 MUDSILL ANCHOR

The P-MASA / P-D1493 Mudsill Anchor is designed to attach wood sill plates to concrete foundations in wood-framed construction. The anchor installs in concrete and secures over the sill plate to provide an attachment point between the foundation and framing member.

Manufactured from 16-gauge galvanized steel for corrosion resistance in interior and exterior environments.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by mudsill anchors. • Sill plate anchorage to concrete foundations • Wood-framed wall assemblies • Residential construction • Light commercial framing
MATERIAL	16-Gauge Galvanized Steel
FEATURES	• Designed for attachment of sill plates to concrete foundations • Embedded anchor configuration for installation in concrete • Pre-formed strap bends over sill plate during installation • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Installation must comply with applicable building codes and project-specific engineering requirements. Installer should verify application compatibility.
WARRANTY	Limited 1-Year
