P-MST SERIES MEDIUM STRAP TIES

The P-MST Series Medium Strap Ties are designed to connect wood framing members in construction assemblies. The long strap configuration allows installation across joints such as plates, studs, rafters, and other framing members.

Manufactured from galvanized steel for corrosion resistance in interior and exterior environments.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by medium strap ties. • Plate-to-stud connections • Floor framing connections • Wall-to-floor connections • Framing member tie applications
MATERIAL	Galvanized Steel
FEATURES	• Long strap configuration for connecting framing members • Pre-punched holes for fastener installation • Compatible with common wood framing layouts • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
