ITEM #H1642

15/32 IN. PANEL SHEATHING CLIP

The 15/32 in. panel sheathing clip is designed for use between adjacent roof sheathing panels where panel edges meet without direct framing support. The clip helps maintain consistent spacing between panels and supports alignment during roof deck installation.

Manufactured from 20-gauge galvanized steel, the clip is compatible with commonly used 15/32 in. plywood and OSB roof sheathing panels. The formed profile installs between panel edges without separate fasteners.

SPECIFICATIONS

APPLICATIONS	• Roof sheathing installations using 15/32 in. panels • Edge support between adjacent plywood panels • Edge support between adjacent OSB panels • Roof deck layouts without direct edge framing support • Residential and light commercial roof sheathing assemblies
MATERIAL	20-Gauge Galvanized Steel
FEATURES	• Sized for 15/32 in. sheathing panels • Supports adjacent panel edges between framing members • Helps maintain consistent panel spacing • Formed steel profile installs between panel edges • Galvanized finish suitable for exterior roof assemblies
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
