#10 HEX HEAD SELF TAPPING SCREWS

The #10 hex head self tapping screw series is designed for fastening metal components in construction, sheet metal, and general assembly applications. The hex head profile supports installation using commonly used hex drivers or nut drivers.

Manufactured from carbon steel, these screws are used in metal-to-metal fastening applications where self tapping screws are commonly specified. Multiple lengths are available to support different material thicknesses and installation conditions.

SPECIFICATIONS

APPLICATIONS	• Metal-to-metal fastening • Sheet metal work and fabrication • HVAC and duct assembly • General construction and maintenance tasks • Light fastening in framing and metal components
MATERIAL	Carbon Steel
FEATURES	• #10 screw profile for general fastening applications • Hex head compatible with common drivers and nut setters • Self tapping point supports installation in metal components • Multiple lengths available for different material thicknesses • Suitable for sheet metal and general construction use
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
