ITEM #H1653

P-SP1 STUD PLATE TIE

The P-SP1 Stud Plate Tie is designed to connect wall studs to top or bottom plates in wood-framed construction. The formed connector installs across the stud-to-plate intersection to provide an attachment point between framing members.

Manufactured from galvanized steel, the compact profile fits typical wall framing layouts and installs using standard fasteners through pre-punched holes.

SPECIFICATIONS

APPLICATIONS	• Stud-to-plate connections • Wood-framed wall assemblies • Residential framing • Light commercial framing
MATERIAL	Galvanized Steel
FEATURES	• Designed for attachment between studs and plates • Compact profile for typical wall framing layouts • Pre-punched holes for fastener installation • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
