ITEM #H1656

5/8 IN. X 6-1/2 IN. HEAVY DUTY SCREW ANCHOR

The 5/8 in. × 6-1/2 in. heavy-duty screw anchor is designed for anchoring components to concrete and masonry in structural and general construction applications. Its threaded screw design allows direct installation into pre-drilled holes without the need for expansion sleeves or inserts.

Manufactured from carbon steel with a zinc-plated finish, the anchor provides reliable fastening performance and corrosion resistance for interior and exterior applications. The hex head allows high-torque installation using standard tools, making it suitable for structural framing, equipment anchoring, and retrofit work.

SPECIFICATIONS

APPLICATIONS	• Structural framing connections to concrete • Equipment and machinery anchoring • Concrete and masonry fastening applications • Retrofit and repair installations • General construction anchoring tasks
MATERIAL	Carbon Steel
FEATURES	• Heavy-duty screw anchor for concrete and masonry • 5/8 in. diameter with 6-1/2 in. length • Hex head design for high-torque installation • Threaded anchor creates secure, removable connections • Zinc-plated finish for corrosion resistance • Eliminates the need for expansion sleeves or inserts
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
