EXTERIOR CONSTRUCTION SCREWS

The exterior construction screw series is designed for wood-to-wood fastening in outdoor construction and general framing applications. Manufactured from carbon steel with a polymer coating, these screws provide corrosion resistance suitable for exterior exposure.

The coarse thread design supports strong holding power in wood substrates. Multiple lengths are available to support a range of framing thicknesses and exterior construction conditions.

SPECIFICATIONS

APPLICATIONS	• Exterior wood-to-wood fastening • Deck and fence construction • General framing and blocking • Outdoor repair and retrofit work • Pressure-treated lumber applications
MATERIAL	Carbon Steel
FEATURES	• Coarse thread design for wood fastening applications • Polymer coating for corrosion resistance in exterior conditions • Suitable for outdoor framing and construction use • Multiple lengths available for different fastening depths • Compatible with commonly used driving tools
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year

AVAILABLE MODELS		
MODEL	**DESCRIPTION**	**ITEM #**
3"	Exterior Construction Screw	H4303
3-1/2"	Exterior Construction Screw	H4303-2
