ITEM #H4338

3.5 IN. CONSTRUCTION SCREW

The 3-1/2 in. construction screw is designed for wood-to-wood fastening in framing and general construction applications. Manufactured from carbon steel, it provides strength and durability for fastening dimensional lumber and structural assemblies.

The longer length allows deeper embedment into wood members, helping improve holding performance in framing and structural fastening tasks. Compatible with standard screw-driving tools, this fastener supports efficient installation in residential and light commercial construction projects.

SPECIFICATIONS

APPLICATIONS	• Wood-to-wood framing connections • Structural lumber fastening • Blocking and bracing installation • Deck framing and substructure assembly • General carpentry and construction work
MATERIAL	Carbon Steel
FEATURES	• Wood-to-wood framing connections • Structural lumber fastening • Blocking and bracing installation • Deck framing and substructure assembly • General carpentry and construction work
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
