P-MSTA SERIES MEDIUM STRAP TIE

The P-MSTA Series Medium Strap Ties are designed to connect wood framing members in a variety of construction applications. The flat strap configuration allows installation across joints such as plates, studs, rafters, and other framing members.

Manufactured from 18-gauge galvanized steel, these straps install flat against framing surfaces using standard fasteners.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by medium strap ties. • Plate-to-stud connections • Rafter or joist framing connections • Framing member tie applications • Wood framing assemblies
MATERIAL	18-Gauge Galvanized Steel
FEATURES	• Flat strap configuration for connecting framing members • Pre-punched holes for fastener installation • Compatible with plates, studs, rafters, and other framing members • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
