ITEM #H4438

P-LTT20 LIGHT TENSION TIE

The P-LTT20 Light Tension Tie is designed to connect wood framing members across floors, walls, and roof assemblies. The elongated strap configuration allows installation along framing surfaces to connect multiple framing components.

Manufactured from formed steel with a galvanized finish for corrosion resistance in interior and exterior environments.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by light tension ties. • Floor-to-wall framing connections • Wall-to-roof framing connections • Multi-member framing tie applications • Wood framing assemblies
MATERIAL	Galvanized Steel
FEATURES	• Elongated strap design for connecting multiple framing members • Pre-punched holes for fastener installation • Compatible with common wood framing configurations • Galvanized steel construction for corrosion resistance
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year

1 YEAR WARRANTY
