P-RPC RAFTER TO PLATE CONNECTORS

Roof framing ties are used to connect rafters or trusses to wall plates in wood-framed construction. These connectors help reinforce roof-to-wall intersections and support secure fastening in residential and light commercial framing projects.

Manufactured from galvanized steel, these ties are designed for durability and everyday jobsite use. Their formed shapes and pre-punched fastening points support straightforward installation with common framing fasteners and tools.

SPECIFICATIONS

APPLICATIONS	Designed for use in applications commonly served by rafter to plate connectors • Rafter-to-wall plate connections • Truss-to-wall plate connections • Roof framing reinforcement • Residential wood framing projects • Light commercial framing applications
MATERIAL	18-Gauge Galvanized Steel
FEATURES	• 18-gauge steel construction for durability • Galvanized finish for exterior and exposed conditions • Designed for roof-to-wall framing connections • Compatible with common framing fasteners • Pre-punched holes support easier installation
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
