ITEM #H5505

2 IN. NOMINAL STUD PLATE TIE

The stud plate tie is used to connect wall studs to top or bottom plates in wood framing. The connector helps keep framing members aligned and secured at stud-to-plate junctions during installation.

Manufactured from galvanized steel, the tie provides durability for typical construction environments. Its compact design fits standard wall framing layouts and installs using common fasteners and tools.

SPECIFICATIONS

APPLICATIONS	• Stud-to-top-plate connections • Stud-to-bottom-plate connections • Wood wall framing assemblies • Reinforcement at stud framing intersections • General residential or light commercial framing
MATERIAL	Galvanized Steel
FEATURES	• Designed for use with nominal 2 in. wall studs • Compact connector for stud-to-plate attachment • Pre-punched holes support installation with common fasteners • Galvanized steel construction for durability • Compatible with standard framing tools and hardware
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
