ITEM #H5509

5/8 IN. X 14 IN. THREADED CONCRETE ANCHOR L-BOLT

The 5/8 in. × 14 in. threaded concrete anchor L-bolt is designed for securing wood or steel components to concrete during new construction. Installed during the concrete pour, the L-shaped bend embeds in the concrete while the threaded end remains exposed for fastening.

Manufactured from carbon steel, this anchor bolt provides a simple and reliable method for attaching sill plates, base plates, and structural members to concrete foundations. The threaded end allows installation with standard nuts and washers for adjustable positioning during assembly.

SPECIFICATIONS

APPLICATIONS	• Attaching sill plates to concrete foundations • Securing base plates to concrete slabs • Anchoring wood framing to concrete • Equipment or structural base connections • General cast-in-place concrete anchoring
MATERIAL	Carbon Steel
FEATURES	• 5/8 in. diameter × 14 in. overall length • L-bend design for embedment in concrete • Threaded end for use with standard nuts and washers • Suitable for cast-in-place concrete installation • Carbon steel construction for strength and durability
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
WARRANTY	Limited 1-Year
