2 IN. SQUARE PLATE WASHER

Square plate washers provide a larger bearing surface than standard round washers when used with anchor bolts or threaded rod. The square profile spreads load across a wider area, reducing wood crushing and fastener pull-through at sill plates and structural connections.

Manufactured from galvanized steel for interior and exterior environments, the series covers 5/8 in. and 3/4 in. anchors, plus a 5/8 in. bearing plate sized for the P-HTT5 heavy tension tie.

SPECIFICATIONS

APPLICATIONS	• Anchor bolt installations at sill plates • Threaded rod connections • P-HTT5 heavy tension tie installations (H5510) • Foundation anchoring and structural fastening • Plate and bracket connections in wood framing
MATERIAL	Galvanized Steel
FEATURES	• 2 in. × 2 in. square profile for an expanded bearing surface • Square shape resists rotation during installation • Fits 5/8 in. and 3/4 in. anchor bolts and threaded rod • Galvanized for corrosion resistance • Bulk packaging for efficient jobsite use
INSTALLATION NOTES	Proponents hardware is engineered for dimensional compatibility with industry standard connector profiles. Products are manufactured to published industry specifications. Fastener type, quantity, and installation requirements should be verified by the installer or design professional based on project requirements and applicable building codes.
