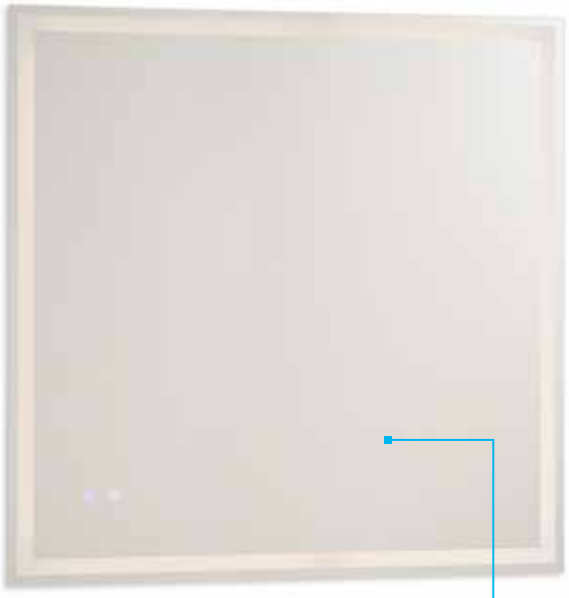
ITEM #IF1100

36 IN. SQUARE FRAMELESS MIRROR WITH LED LIGHT



This LED mirror pairs integrated lighting with a clean aluminum frame for modern bathroom installations. A touch switch controls the lighting, and the mirror is available in 3000K, 4000K, and 6000K color temperatures to suit warm or cool interior finishes.

A built-in anti-fog function helps keep the mirror surface clear in humid bathrooms, and an IP44 rating provides protection against splashing water. The mirror plugs into a standard outlet using a US UL standard plug.
