ITEM #IF1374

PRIVACY DOOR LEVER

MORE STYLES AVAILABLE

This privacy door lever is intended for interior doors requiring a locking function, such as bathrooms and bedrooms. It fits standard door preparations and is commonly used in residential, multifamily, and build-to-rent projects.

Builders select this lever for its straightforward installation and consistent function across repeated layouts. The adjustable 2.36 in. to 2.76 in. (60/70 mm) backset supports standardized door conditions, and all required mounting hardware is included.

The lever is constructed from stainless steel 201 with a matte black finish and installs using standard door prep.
