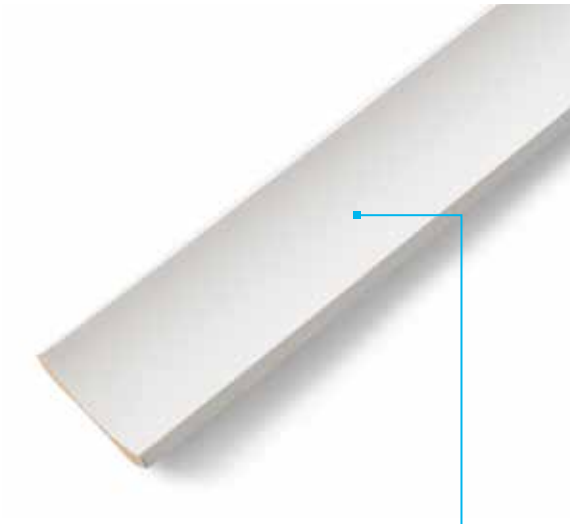
ITEM #IF1688

MDF COVE CROWN MOULDING



This MDF cove crown moulding is designed for interior trim applications at ceiling-to-wall transitions. The moulding is factory primed on both the face and back using gesso and waterproof glue to help reduce moisture absorption and maintain dimensional stability. The smooth MDF surface supports consistent paint finishes, and the cove crown profile provides a clean transition between walls and ceilings in residential and light commercial interiors.

SPECIFICATIONS

APPLICATIONS	• Ceiling-to-wall crown moulding • Decorative ceiling trim • Interior architectural detailing • Residential interiors • Light commercial interiors
MATERIAL	MDF (Medium Density Fiberboard)
FEATURES	• MDF construction for consistent profiles • Cove crown decorative profile • Gessoed surface • Waterproof glue primer • Primed on face and backside • Factory primed and paint ready
INSTALLATION NOTES	Interior use only. Acclimate material prior to installation. Fasten using finish nails or brads into framing or approved substrate. Seal cut ends with primer. Follow standard MDF expansion and spacing practices. Do not install in wet or exterior environments.
