ITEM #L1709

ALUMINUM DRIP CAP FLASHING

This aluminum drip cap flashing is used above doors, windows, and trim to direct water away from wall openings. The profile helps shed water outward, reducing the risk of moisture intrusion behind siding or trim. Manufactured from aluminum for corrosion resistance, it provides a lightweight flashing solution for exterior wall assemblies and trim installations.

SPECIFICATIONS

APPLICATIONS	• Window head flashing • Door head flashing • Exterior trim protection • Siding transitions • Residential and light commercial exterior wall assemblies
MATERIAL	Aluminum
FEATURES	• Aluminum construction • Drip cap profile for water shedding • Corrosion resistant • Lightweight and easy to cut • Designed for exterior flashing applications
INSTALLATION NOTES	Install above doors, windows, or trim with the vertical leg behind siding or weather barrier. Fasten to framing or sheathing using appropriate fasteners. Ensure proper overlap with surrounding flashing and weather-resistant barrier.
DIMENSIONS	11/16" × 1-5/8" × 12'
WARRANTY	Limited 1-Year
