ITEM #M1765

ROLLED ALUMINUM FLEXIBLE DUCT

This 4 in. × 25 ft. single-layer aluminum flexible duct is designed for short-run air transfer and exhaust applications in residential and light commercial systems. Its uninsulated construction makes it suitable for conditioned spaces where thermal control is not required.

The flexible aluminum core allows easy routing around obstacles and tight spaces, while maintaining consistent airflow performance. Supplied in a compressed length for efficient storage and handling, the duct expands fully during installation and connects easily to standard round duct fittings. Ideal for bath fans, range hoods, dryer transitions, and general ventilation runs.

SPECIFICATIONS

PACKAGE CONTAINS	Rolled aluminum flexible duct
MATERIAL	Aluminum foil and steel wire
STOCK COLOR	Silver
FEATURES	• UL 181 Class 1 compliant – Air duct safety standard • Fire resistance: Class A2 (UL-rated) • Designed for high temperature tolerance (–30 °C to +150 °C) • Supports high airflow and pressure conditions • Single-layer laminate of aluminum foil + PET
DIMENSION	4" Diameter × 25' Length
WARRANTY	Limited 5-Year

5 YEAR WARRANTY
