ITEM #M1825

ECOPONENTS™ 1.5 TON AIR HANDLER

This 1.5-ton Ecoponents™ air handler is designed for flexible installation and efficient performance across a wide range of residential HVAC applications. Multi-refrigerant compatibility supports R-22, R-410A, R-454B, and R-32 systems, with A2L readiness and a factory-installed Refrigerant Detection System where required.

A high-efficiency aluminum DX coil with rifled copper tubing provides strong heat transfer and long-term reliability. The constant-torque ECM blower motor delivers consistent airflow with improved energy efficiency, while the fully insulated, low-leakage galvanized steel cabinet helps reduce sound and air loss. Installation flexibility is supported through front or bottom return options, left- or right-hand connections, and modular electric heat kits up to 10 kW.

ECOPONENTS

SPECIFICATIONS

PACKAGE CONTAINS	Air handler
MATERIAL	Galvanized steel cabinet. DX coil made with rifled copper tubes and enhanced aluminum fins
FEATURES	• Multi-refrigerant compatibility (R-22, R-410A, R-454B, R-32) with A2L readiness and factory-installed Refrigerant Detection System where required • High-efficiency aluminum DX coil with rifled copper tubing for strong heat transfer and long-term reliability • 208/240V constant-torque ECM motor with direct-drive, multi-speed blower for consistent airflow and energy efficiency • Fully insulated, low-leakage galvanized steel cabinet designed for quiet operation and minimal air loss • Installation flexibility with front or bottom return options, left- or right-hand connections, and modular electric heat kits up to 10 kW
WARRANTY	Limited 10-Year

10 YEAR WARRANTY
