ITEM #M2188

8" SUPPLY GRILLE

This 8 in. × 4 in. supply air grille is designed for controlled delivery of conditioned air in residential and light commercial HVAC systems. Its compact size makes it well suited for smaller rooms, branch duct terminations, and tight wall or ceiling installations.

Fixed louvers direct airflow efficiently into the space while maintaining a clean, low-profile appearance. Constructed from durable metal and factory finished in matte white, the grille installs easily into standard openings and is packaged in bulk to support multi-unit and large-scale builds.
