ITEM #M2189

10" SUPPLY GRILLE

This 10 in. × 6 in. supply air grille is engineered for even distribution of conditioned air in residential and light commercial HVAC applications. The increased face area supports higher airflow volumes, making it a practical choice for larger rooms and open layouts.

Fixed louvers provide steady airflow without adjustment, while the factory-applied matte white finish delivers a consistent, finished look across installations. Designed for fast installation into standard wall or ceiling openings, this grille is bulk packaged to streamline ordering and jobsite staging on large projects.
