FULL LITE STEEL PATIO DOORS

MORE STYLES AVAILABLE

This prehung steel patio door pairs a full-lite glass panel with an insulated steel slab for a bright, modern entry to balconies and patios. A 22 in. × 64 in. Low-E insulated glass unit with argon fill improves thermal performance, while the PU-insulated core adds efficiency and reduces deflection.

Each unit arrives prehung on a 6-9/16 in. wood jamb with an adjustable threshold and double-bore lock prep for fast installation. Available as a single door in left- or right-hand configurations, or as a double door.

SPECIFICATIONS

APPLICATIONS	• Balcony and patio entries in multifamily units • Townhome and apartment rear entries • Residential new construction • Light commercial exterior openings
MATERIAL	Steel door panel with PU-insulated core, Low-E insulated glass, and wood jamb
FEATURES	• Prehung unit saves time over slab-only installs • Full-lite Low-E glass with argon fill • PU-insulated core for thermal efficiency • Adjustable threshold for installation flexibility • Double-bore lock preparation
INSTALLATION NOTES	Ensure jamb and sill are level and square before fastening. Shim at hinge and lock locations for proper alignment. Apply sealant beneath the sill for weather resistance. Follow applicable UL installation guidelines to maintain fire rating.
DIMENSIONS	See below for options
WARRANTY	Limited 3-Year Warranty

CONFIGURATION	DOOR SIZE	JAMB	THRESHOLD	ITEM #
Single, right hand	35-3/4" × 79" × 1-3/4"	6-9/16"	7-9/16" adjustable	O5005
