ITEM #P4451

ECOPONENTS™ ELONGATED DUAL FLUSH TOILET

The Ecoponents™ toilet is a complete, floor-mounted, tank-on-bowl solution that installs with standard tools. Its dual flush, pressure-assist system delivers WaterSense-level efficiency at 1.1 GPF for light flushes and 1.6 GPF for heavy flushes operated via a sleek matte-black top button.

An elongated bowl and soft-close, preattached seat offer comfortable ergonomics. The fully glazed exterior resists buildup for easy cleaning without extra sealant. The kit includes everything needed—wax ring, bolts, flange screws, gasket, supply line, lid, fittings, and manual—and its durable ceramic construction meets WaterSense and cUPC certifications.

SPECIFICATIONS

APPLICATIONS	• Residential bathrooms • Multi-family housing • Commercial restrooms • New construction and remodel installations
MATERIAL	Ceramic
FEATURES	• Full kit: toilet bowl, tank and lid, soft-close toilet seat, flange bolts, bolt caps, wax ring, supply line and instruction manual. • Two-piece toilet design • Pressure-assisted dual flush (1.1 / 1.6 GPF) • Elongated bowl • Fully glazed exposed trapway • Flush button actuator • WaterSense certified • cUPC certified
INSTALLATION NOTES	Install as a floor-mounted toilet with standard 12 in rough-in. Align bowl to closet flange and secure with flange bolts. Install wax ring between flange and outlet. Attach tank to bowl per manufacturer instructions and connect supply line. Verify all connections and test flush operation after installation.
