ITEM #VARIES

CALACATTA WHITE QUARTZ BACKSPLASH (2CM)

This polished 2CM quartz backsplash comes in a standard 4" height that finishes the countertop edge with a clean, easy-to-clean transition to the wall. Factory-cut pieces come with eased edges and pre-finished surfaces for fast installation. Pieces are sized for common layouts and can be cut to fit.

The same 2CM material also works as a waterfall backsplash. In that application, the quartz runs from the countertop up the wall, sometimes to full height, so the surface reads as one continuous piece. You get the clean, modern look of a full-slab install at a lower cost than tile or custom fabrication. The Calacatta White surface looks like natural marble but has the durability of engineered stone. It resists moisture and stains and never needs sealing.

SPECIFICATIONS

APPLICATIONS	• Standard 4" countertop backsplashes • Full-height kitchen backsplashes available • Vanity and bathroom backsplashes • Accent walls behind ranges, bars, and coffee stations • Multifamily, hospitality, student housing, and single-family construction
MATERIAL	Engineered Quartz
FEATURES	• Calacatta White quartz surface • Polished finish • Factory eased edges • Pre-cut slab sizes for common installations • Selected vanity tops include pre-drilled faucet holes • Non-porous surface • Stain and moisture resistant • No sealing required • Marble-look appearance
INSTALLATION NOTES	Install with construction adhesive on a clean, flat wall or substrate. Seal wall and countertop joints. Waterfall and full-height installs may need temporary support while the adhesive cures. Mitered transitions from countertop to backsplash may require fabrication.
DIMENSIONS	2CM Thick. Standard 4" height; waterfall and full-height pieces vary
WARRANTY	Limited 1-Year
