CALACATTA WHITE QUARTZ BATHROOM COUNTERTOP (2CM)

This polished 2CM quartz vanity top is made for fast, efficient installation in bathrooms and powder rooms. Factory-cut slabs com with eased edges and pre-finished surfaces, which reduces on-site fabrication. Some configurations include pre-drilled faucet holes. Tops are sized for common vanity layouts and can be cut to fit othe configurations.

The Calacatta White surface looks like natural marble but has the durability and consistency of engineered stone. The non-porous surface stands up to water, toiletries, and daily use, and it never needs sealing. The 2CM profile gives a clean, lighter look that suits both standard and compact vanities.
