ITEM #SW1941

DECORATIVE RAFTER TAIL, ROUGH SAWN

This decorative rafter tail is used to create exposed rafter-end details at roof eaves and overhangs. The molded profile provides the appearance of a traditional wood rafter tail while maintaining consistent shape and dimensions. The hollow back channel allows the piece to mount over framing or blocking. The rough sawn surface texture provides a paint-ready finish for exterior architectural trim applications.

SPECIFICATIONS

APPLICATIONS	• Roof eave decorative accents • Exposed rafter tail details • Porch and overhang trim • Exterior architectural trim installations • Residential exterior construction
MATERIAL	Polyurethane foam with resin outer shell
FEATURES	• Molded decorative rafter tail profile • Rough sawn texture surface • Lightweight construction • Hollow back channel for mounting • Paintable exterior surface • Designed for exterior architectural trim
INSTALLATION NOTES	Install over rafter ends or mount to blocking behind fascia. Fasten using exterior screws and construction adhesive. Fill fastener holes and seal joints with exterior-grade sealant before painting.
DIMENSIONS	3" H x 8" W x 24" L
