ITEM #T1828

METAL TILE EDGE TRIM

This metal tile edge trim is used to finish and protect exposed tile edges at walls, floors, and outside corners. The trim installs during tile setting and provides a straight termination where tile meets other surfaces. Manufactured from aluminum with a factory-applied dark grey finish, it provides a durable edge and consistent appearance across tile installations.

SPECIFICATIONS

APPLICATIONS	• Tile edge termination • Outside tile corners • Shower and wet area tile edges • Backsplashes • Floor-to-wall tile transitions • Residential and commercial tile installations
MATERIAL	Aluminum
FEATURES	• Dark grey factory finish • Protects exposed tile edges • Provides straight tile termination • Installs during tile setting • Compatible with ceramic, porcelain, and stone tile
INSTALLATION NOTES	Install during tile setting by embedding the anchoring leg in tile adhesive or mortar. Align the trim edge with the tile surface and set tile against the profile. Ensure proper alignment before adhesive cures.
DIMENSIONS	1 in H × 0.5 in W × 98.5 in L
WARRANTY	Limited 1-Year Warranty
